HEALTH ARTICLE ON SCOLIOSIS (Part 3)

Due to a failure in early detection, African American patients are 10% more likely to need surgery in correcting scoliosis. African Americans are also more likely to have a larger curve degree than whites. These results show the importance of detecting scoliosis while the spine curve is still slight. --Alaina Washington

In preparation for ordering **OFFERING ENVELOPES FOR THE 2020 CALENDAR YEAR**, the finance department needs updated address information for members who have moved since receiving the 2019 offering envelopes. Change of address forms are available on the registration table. Completed forms should be placed in the church clerk’s box in the administration area. Also, if you choose to use Givelify in 2020, please indicate that on this form as well.
